## Event Details

**Date of the Event:** December 30th, 2022

**Venue:** Student Activity Centre

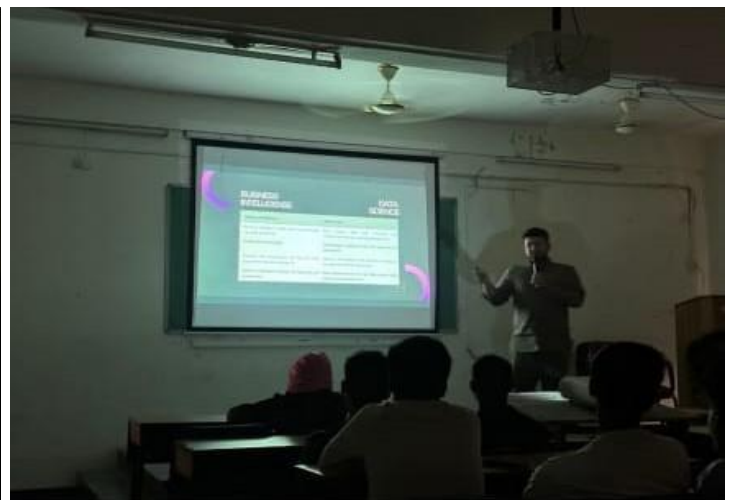

**Timings:** 2:30Pm - 5:30Pm

**Number of students attended:** 60

Systems, Man and Cybernetics Society, MJCET organized a workshop on 'Unveil Data Science' by their team.

The workshop gave a complete overview on how to get started with practical data science along with a guided hands-on project to give a glimpse of data science solutions for business problems.

The aim was to broaden analytical and technical skills to solve data-oriented real world problems.

Team SMC addressing the gathering

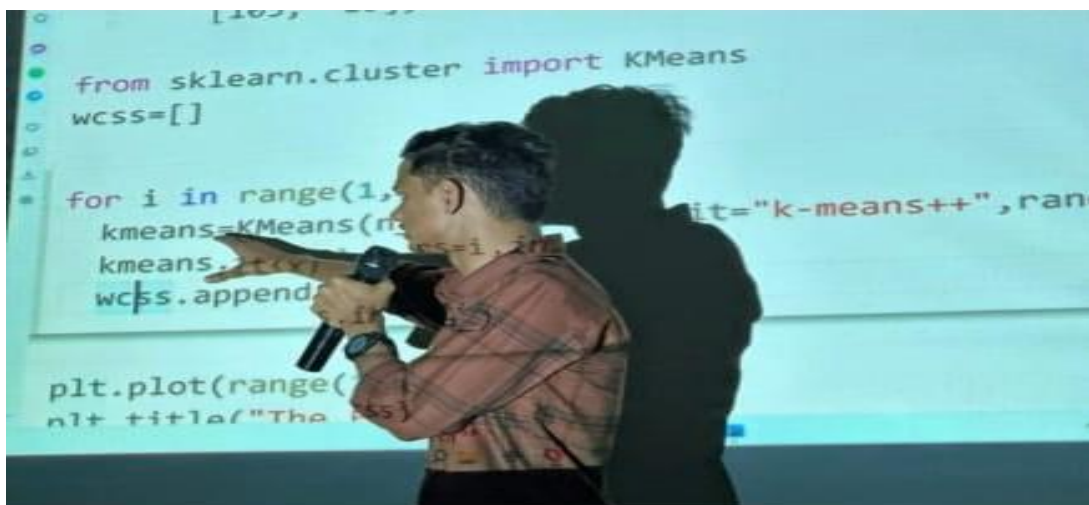

The event began with a warm welcome and introduction by our host Ayesha Siddiq, followed by a session on Introduction to Data Science and job roles in Data Science by Syed Zaid.

Then, Sardaruddin Syed followed up with a detailed explanation of the Data Science process. Further, Muzammil Ahmed proceeded to showcase the methods and tools in Data Science along with structuring a business problem and solving it using Data Science.

Audience during the event

The day was concluded with a hands-on session by Syed Abdul Mubashir who guided the students by solving a real world Data Science problem.

Hands-on Session
