Electronics & Communication Engineering Dept,  
Muffakham Jah College of Engineering & Technology,  
Hyderabad.

To,

Mr. Zakir Hussain,

Asst. Professor, ECED.

Sub: Conduction of Workshop on "Professional Ethics"- Regarding.

It is to inform you that Professional Ethics is important because it dictates to professionals a series of rules related to the way a professional acts towards the people with whom he/she relates professionally. From a philosophical point of view, ethics has to do with morality and with the way people act in the sense of goodness or badness.

In this regard, you are requested to plan a Workshop for the Students of MJCET on "Professional Ethics" and inform the date, schedule, resource person and industry/institute.

Thanking You,

Head, ECED

Day1: Dr. Kaleem Fatima : Human values

### OBJECTIVES (WHY ENGINEERING ETHICS?)

The objectives of this course on 'Professional Ethics and Human Values' are: (a) to understand the moral values that ought to guide the Engineering profession, (b) resolve the moral issues in the profession, and (c) justify the moral judgment concerning the profession. It is intended to develop a set of beliefs, attitudes, and habits that engineers should display concerning morality.

Day2: Dr. Ayesh Naaz : Engineering Ethics

Engineering Ethics is the activity and discipline aimed at

- (a) understanding the moral values that ought to guide engineering profession or practice,
- (b) resolving moral issues in engineering, and
- (c) justifying the moral judgments in engineering. It deals with set of moral problems and issues connected with engineering.

Day3: Dr. Nazia Parvin: Engineering as Social Experimentation

Engineering as experimentation before manufacturing a product or providing a project, we make several assumptions and trials, design and redesign and test several times till the product is observed to be functioning satisfactorily. We try different materials and experiments. From the test data obtained we make detailed designs and retests.

Day4: Mrs Nazeerunnisa: Safety, responsibilities and rights

Day5: Mrs B Sucharitha: Global issues

Globalization means integration of countries through commerce, transfer of technology, and exchange of information and culture. In a way, it includes acting together and interacting economies through trade, investment, loan, development schemes and capital across countries. In a different sense, these flows include knowledge, science, technology, skills, culture, information, and entertainment, besides direct human resource, tele-work, and outsourcing. This interdependence has increased the complex tensions and ruptures among the nations. For the engineers, the issues such as multinational organizations, computer, internet functions, military development and environmental ethics have assumed greater importance for their very sustenance and progress.

### Outcome of workshop

1. To help the students appreciate the essential complementarity between 'VALUES' and 'SKILLS' to ensure sustained happiness and prosperity which are the core aspirations of all human beings.
2. To facilitate the development of a Holistic perspective among students towards life, profession and happiness, based on a correct understanding of the Human reality and the rest of existence. Such a holistic perspective forms the basis of Value based living in a natural way.
3. To highlight plausible implications of such a Holistic understanding in terms of ethical human conduct, trustful and mutually satisfying human behaviour and mutually enriching interaction with Nature.
