(Estd. by sultan-Ul-Uloom Education Society in 1980)
(Affiliated to Osmania University, Hyderabad)
(Approved by the AICTE & Accreditated by NBA)

1.4.2 Report of analyses of feedback received from different stakeholders (2020-2021)

The IQAC of the institution comprising of senior faculty members collects feedback regularly on the syllabus, teacher's performance, theoretical and practical aspects of knowledge, infrastructure etc. from various stakeholders such as students, teachers, alumni and employers. Students' feedback on teachers' performance and progress of course work is collected subject wise for the strategic development of the teaching-learning process and academic excellence. It is also taken into account for faculty performance approval.

Feedback is collected from alumni on the relevance of courses, syllabus, theoretical and practical elements of knowledge etc. through online and offline modes. Their insightful suggestions provide a significant and deeper understanding of the effectiveness of the syllabus, its role in developing professional and employability skills and eventually making them industry-ready. Besides, it guides especially the final year students to choose a suitable short-term professional programme of their domain or to pursue higher education at a foreign university.

The feedback collected from faculty, students, alumni and employers on the syllabus is analyzed through a departmental committee and sent to the respective authorities for the necessary action. The committee has proposed the following courses as add-on courses for various engineering programmes.
