Hyderabad.

Sub: Permission to Conduct Workshop on "Online Three Days Skill Development Program by C-DAC" to CSE and IT Students -Reg

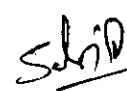

Sir,

I am pleased to inform you that workshop on "Online Three Days Skill Development Program by C-DAC" for the Students of C.S.E and I.T students is scheduled in accordance with the mail received from C-DAC.

Schedule as follows.

Date:	17/12/2020 , 22/12/2020 & 29/12/2020
Title of Webinar	Online Three Days Skill Development Program by C-DAC
Resource Person	R& D team C-DAC
Participants	B.E IV (CSE & IT) Year Students

So, I request you to grant the permission to conduct Online Three Days SDP

Faculty Incharge
Dr. Sabir Hussain,
Associate Professor

C-DAC Training <training-hyd@cdac.in>

to

Dear Sir/Madam,

Greetings from C-DAC, Hyderabad !!

Centre for Development of Advanced Computing (C-DAC) is a scientific society of the Ministry of Electronics & Information Technology, Government of India, carrying out Research and Development (R&D) in IT, electronics and associated areas. Different thematic areas of C-DAC's research include high performance computing, grid and cloud computing, multilingual computing, professional electronics, software technologies, cyber security, health informatics, ubiquitous computing, and education & training. Over the years C-DAC has designed and delivered various postgraduate and undergraduate degree and diploma programs

The R&D team of C-DAC, Hyderabad is delivering expert talks on various topics to the students of engineering to get an exposure towards latest trends in industry. Team had wide experience in R&D, skill based training and developed various products/solutions with specific to their domain expertise.

There is no fee to attend this webinar. Enclosed herewith detailed brochure. For registration, please visit: <https://bit.ly/33XVoCt>

We request you to kindly proliferate the same among your students(who are unplaced, looking for career guidance & quality training on emerging/core technologies with placement opportunities) so that they benefit from this opportunity

With best regards,

Vara Prasad BSRK

Dear Madam,

Greetings from T.J.M.E.!!!

T.J.M.E. is a professional organisation founded by the alumni of the Indian Institutes of Management (IIMs) and other premier management institutes of the country.

T.J.M.E. as an organization has unmatched expertise in conducting webinars, seminars and workshops for career guidance and skill enhancement. We have been doing these workshops in selective Engineering, Degree & P.G. colleges in the whole country at regular intervals. We are delighted to say that the response of the students towards these sessions has been very enthusiastic and everyone has benefited immensely from these webinars. Our expert Faculty/Course Director would conduct these webinars and all the queries of the students regarding different opportunities will be addressed.

List of topics for Webinars:

- Placement scenario amid COVID-19
- Career Options after Graduation
- MBA as a Career Option
- How to prepare a good resume
- How to prepare for Personal Interview / FAQ in Personal Interview
- Push your brain without a pen/Calculate faster than calculator
- Remove your vocab phobia: 100 words in 100 mins/Roots to Fruits/Visual vocabulary
- Puzzles to puzzle you: Logical reasoning solo session
- Grammar can be fun
- Fun with Numbers/Magic of numbers
- RC Made Easy/RC the RC (Really Crack the RC)
- How to improve your public speaking skills
- Tips on Email/Letter/Essay writing

We would like to conduct the webinar of your choice for you B. Tech III & IV year students on an online platform based on mutual consent. The webinar would essentially require two hours to justify the topic. Kindly make provision for the same.

For further information/clarifications please contact Isaac - 9177878779

Thank you.

Regards,
Isaac Aliada

Webinar

on

"Presentation Skills - Essentials for Career Success"

Date: 16th October 2020, Friday **Platform :** ZOOM

Time: 2:30 PM to 5:30 PM

INTRODUCTION

The Department of English conducted a webinar on **"Presentation Skills - Essentials for Career Success"** for the students on zoom platform.

The webinar focused on language skills required to present topics and deliver presentations in both academics and workplace scenarios confidently and effectively. There were total 121 lateral entry students from all the departments of MJCET.

Ms. Sami Almas, the Chief Image Consultant at LifestyleMIC, Hyderabad delivered the lecture. She is a leading image consultant, entrepreneur, corporate trainer and a leadership coach working with individuals and organizations helping them realise their potential as well as portray an appropriate image relevant to their professional & personal life.

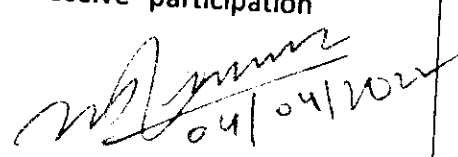

The course content delivered in the webinar was as follows:

The webinar commenced with a presentation by Dr .Shabana Thayniath on the journey of the department and the events organized by the department. After that Adnan Ali Khan BE 2/4 EEE introduced the guest speaker to the audience.

The Guest Speaker of the session Ms. Sami Almas presented the valuable ideas on "Presentation Skills - Essentials for Career Success". She discussed the basic concepts used in presenting oneself supported by the best suitable real life examples which are essential for the image building. She projected a clear understanding of the importance of presentation skills in the real world. She inspired the audience by lively interactions on topics and new trends in professional platforms. She stressed upon the importance of analysing the subject, developing an understanding of descriptive and predictive Analytics, building models for day-to-day applicability to take active decisions, using 5Ws for easy understanding. She emphasized on developing one's confidence. She projected on comprehending the theoretical concepts and relating to the practical aspects of communication. She insisted on approaching higher programmes for deep learning & betterment.

In the question answer session the guest speaker answered questions asked by participants and shared valuable tips for image building. The vote of thanks was proposed by Dr. Gitasri Mukherjee in an enthusiastic manner, on behalf of the department she appreciated and expressed gratitude to the management SUES and the Director Cum Advisor Basheer Ahmed sir for all the support and encouragement. She also thanked the deans and the HOD, Humanities & Basic Sciences for the extended support. The remarkable contribution made by the students in making the webinar successful was also acknowledged.

The main purpose in arranging the programme was to motivate the participants through sharing of knowledge and practical experience of Ms. Sami Almas, who has long years of experience in Image Consultation. The feedback of the session from the participants was taken in the questionnaire form. The overall organization and deliverance of the webinar was helpful and satisfied the participants. The Participants will receive participation certificate

18TH AND 20TH JANUARY 2021
FROM
2:00 TO 3:00 PM

Technology for English Language Learning

Objective: Enable learners to use Online Resources and Technology for developing English Language Proficiency

It may be pointed out that the *Objective of the lecture is in sync with the Mission Statement* of Muffakham Jah College of Engineering & Technology:

to “nurture and strengthen auxiliary soft skills for overall development and improved employability in a multi cultural work space” and

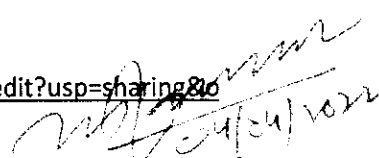

“develop a constructive attitude in students towards the task of nation building and empowering them to become future leaders.”

“Technology for English language learning”

By

Dr. Sher Mohammed Khan, Asst. Professor, and Dr. Shabana Thayniath Assoc –Prof

A total of 580 students attended the webinar and following are highlights of the same.

Introduction to Technology and English Language Learning

Smartphones have become so handy today that it's almost impossible to catch anyone without it. Using smartphones to learn English Language Skills (LSRW) will be an easier and effective way. This webinar is intended to provide direction to learners (engineering students) and to introduce them to certain free resources available on the internet.

With the increase in the modes of communication that technology provides, people throughout the world are able to connect using the internet and a lot of the communication that goes on is done in English. English has become the global language; the language that many people use for communication because so many people know English. So, English has a special relationship with technology because the spread of technology has also been accompanied in many cases by the spread of English, the spread of opportunities to learn English, and the spread of opportunities to communicate with a variety of different people throughout the world.

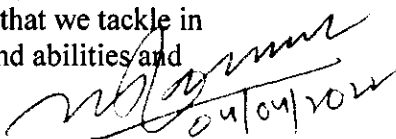

Technologies for Learning. Technologies today are widely used not only for communication but also for learning. In many schools and universities course materials are delivered by computer. And in some courses the books are not being used anymore but instead computer technology is used. Students use interactive technology to do their course assignments. Students also use course management systems to submit their assignments to their teachers and to communicate with each other and with the teacher.

These three connections to technology contribute to the topic of this webinar. In other words, our topic is affected by these larger trends in society: the connection between technology and language, the connection between technology and learning, and the connection between technology and the English language. All of those connections operate outside of our classrooms, but they all impact what happens with how we use technology for English language learning. All of these larger societal trends provide new opportunities for us to use technology for English language teaching and learning.

How can learners/teachers use communication and learning technologies for English language learning?

Technology for English Language Learning. As a result of these trends and the development of technologies for English language learning, students and teachers need to learn where they fit in this dynamic world of technology. Teachers need to learn about the resources and how to use them to develop pedagogy. And learners must be able to use the resources that technology provides in a variety of ways that changes what they do in the classroom.

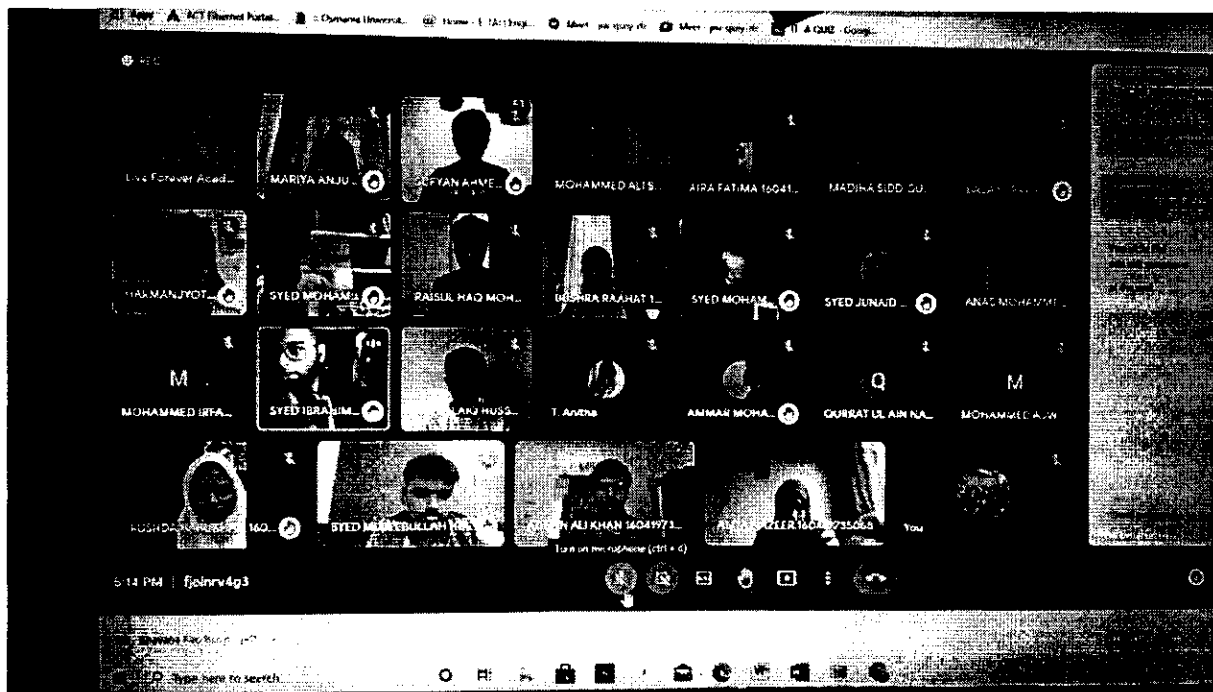

To do this we will look at **six areas of English language learning: Vocabulary, Grammar, Reading, Speaking, Listening and Writing.** Each of these areas is something that we tackle in the English language classroom, even though students use all of these skills and abilities and knowledge together when they create new meanings.

“Technology for English language learning”

By

Dr. Sher Mohammed Khan, Asst. Professor, and Dr. Shabana Thayniath Assoc –Prof

For each of these areas we'll look at how students learn and how technology can help

PRINCIPAL
Muffakham Jah College Of
Engineering & Technology
Banjara Hills, Road No. 3,
HYDERABAD-500 034.(T.S.)

Technology for LISTENING, VOCABULARY GRAMMAR ,SPEAKING, READING AND WRITING.

Overall, these technologies have really expanded the ways we communicate with each other. Long ago we used to communicate using face to face oral communication. That changed with the addition of written language and paper and now once again our technologies for communication have developed to give us many and varied of opportunities for communication.

Technologies today are widely used not only for communication but also for learning. In many schools and universities course materials are delivered by computer. And in some courses the books are not being used anymore but instead computer technology is used. Students use interactive technology to do their course assignments. Students also use course management systems to submit their assignments to their teachers and to communicate with each other and with the teacher.

As a result of these trends and the development of technologies for English language learning, teachers need to learn where they fit in this dynamic world of technology. Teachers need to learn about the resources and how to use them to develop pedagogy. A lot of teachers who use technology see their pedagogy changing because they are able to use the resources that technology provides in a variety of ways that changes what they do in the classroom

all of these skills and

REPORT

The ECE department conducted the MJCET FIT INDIA 2020 event as per the AICTE Directive mail in Football ground of MJCET Campus on Thursday, 29th August 2020.

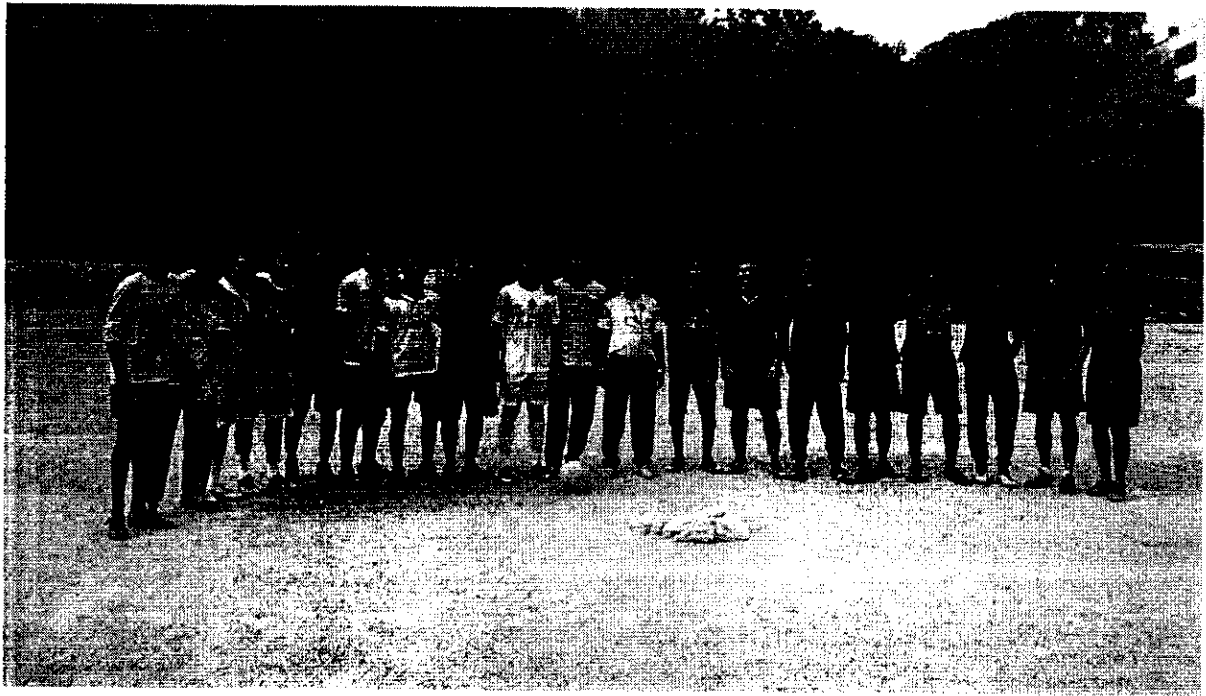

About fifty (50), 2nd and 3rd year students participated in this flash program held on a very short notice. Various sports like cricket and football for boys and badminton for girls was organized.

Dr. Mohd.Arifuddin Sohel, Prof. and Head, ECE Dept coordinated the event with the assistance of Physical Director, MJCET, Mr. Mohd.Zabhiuddin.

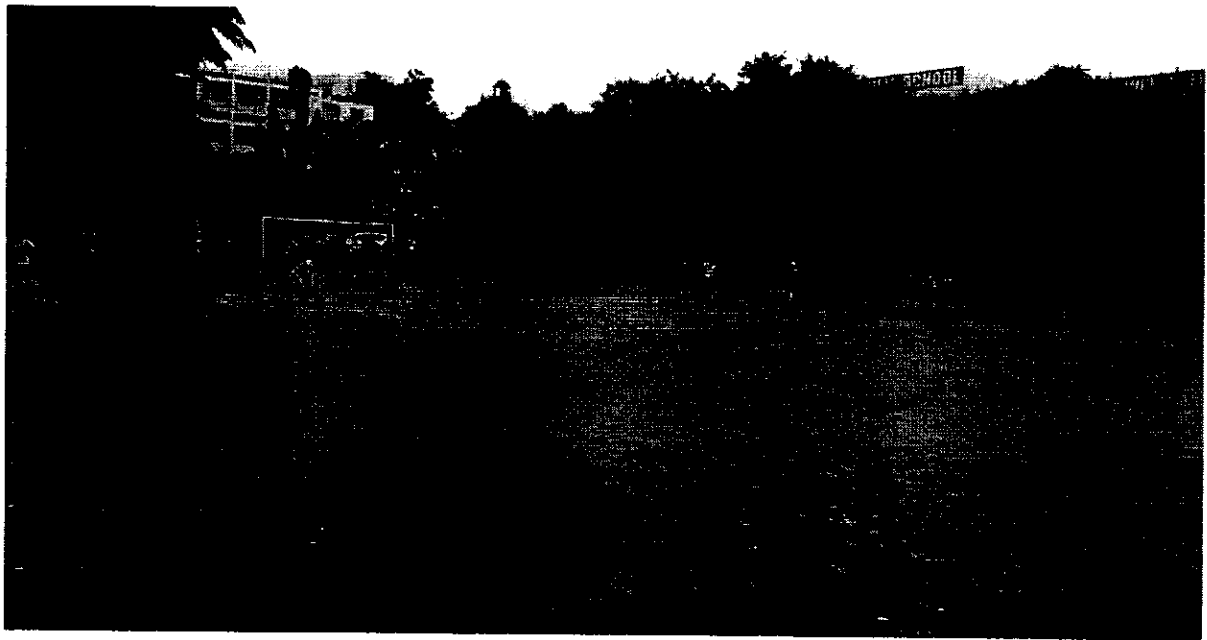

Boys formed the teams to play football, cricket and had a 1K run around the football ground.

**A Report on a Talk "Psychological counselling "by Dr.Suman Roy held
on 15/12/2020(1:45pm to 2:45pm)**

Dr.Suman Roy, Psychologist, SUES gave a lecture on "Psychological counselling ". A person's mental fitness indicates their ability to think clearly and to make decisions efficiently and efficiently. A parallel can be drawn with physical fitness, which relates to the body's ability to function. Mental fitness keeping your emotional health and brain in good shape. It's good for us to keep our brain active and exercised, but it is just as important to allow time for rest and relaxation. Actively managing stress and building resiliency are also great methods for maintaining or improving mental fitness.

This Counselling session "Psychological counselling" by Dr.Suman Roy was attended by ECE-A, ECE-B, IT-A, MECH-B and CSE-A first year students and it was a huge success.

DEPARTMENT OF PHYSICAL EDUCATION

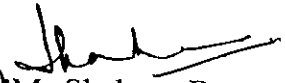

Circular

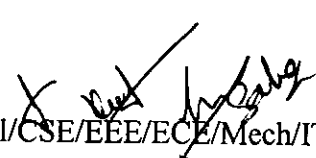

07-01-2021

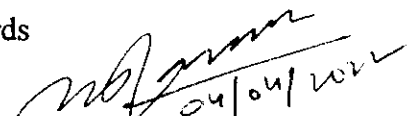

**To
ALL The Heads of Depts /Sections
MJCET**

The Dept of physical Education is conducting a Yoga session by Mr. G M Naved, Asst. Yoga teacher, to create awareness among students about the benefits of regular exercises on 9th Jan 2021.

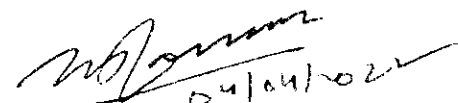

You are kindly requested to inform and encourage the II year students of Muffakham Jah College of Engineering to participate actively.

Ms. Shaheen Begum
I/c Physical Director,
Physical Education Department

A REPORT ON TWO DAY EVENT ON DIGIPEDIA

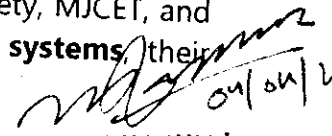

Date: 10th & 11th DEC 2020

Time: 2pm-5pm

Venue: Google Meet

No. of Attendees: 516

On Day 1 and 2 of the course DIGIPEDIA conducted by IEEE Circuits and Systems Society, MJCET in collaboration with IEEE Robotics and Automation Society, MJCET, and Robotics Center, MJCET the topics covered were **different number systems**, their

PRINCIPAL
Muffakhm Jah College Of
Engineering & Technology
Banjara Hills, Road No. 3,
HYDERABAD 500 034

conversions, signed magnitude representation, compliment representation, and lastly discuss the **types of codes**.

Number systems:

In digital systems, digits and symbols are used to represent different values, depending on their radix.

Types of Number System:

1. Binary Number System
2. Decimal Number System
3. Hexadecimal Number System
4. Octal Number System

Binary Number System

Generally, a binary number system is used in digital computers. In this number system, it carries only two digits, either 0 or 1. There are two types of electronic pulses present in a binary number system. The first one is the absence of an electronic pulse representing '0' and the second one is the presence of an electronic pulse representing '1'. Each digit is known as a bit. A four-bit collection (1101) is known as a nibble, and a collection of eight bits (11001010) is known as a byte. The location of a digit in a binary number represents a specific power of the base (2) of the number system.

Characteristics:

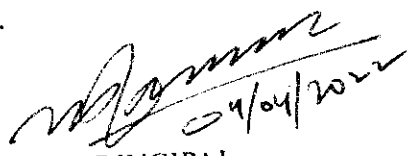

1. It holds only two values, i.e., either 0 or 1.
2. It is also known as the base 2 number system.
3. The position of a digit represents the 0 power of the base(2). Example: 2^0
4. The position of the last digit represents the x power of the base(2). Example: 2^x , where x represents the last position, i.e., 1.

Examples:

$(10100)_2$, $(11011)_2$, $(11001)_2$, $(000101)_2$, $(011010)_2$

Decimal Number System

The decimal numbers are used in our day to day life. The decimal number system contains ten digits from 0 to 9 (base 10). Here, the successive place value or position, left to the decimal point holds units, tens, hundreds, thousands, and so on.

HYDERABAD-500 034 (T.S.)

Binary to Decimal Conversion

The process of converting binary to decimal is quite simple. The process starts from multiplying the bits of binary numbers with their corresponding positional weights. And lastly, we add all those products.

Example 1: $(10110.001)_2$

We multiplied each bit of $(10110.001)_2$ with its respective positional weight, and last we add the products of all the bits with its weight.

Binary to Octal Conversion

The base numbers of binary and octal are 2 and 8, respectively. In a binary number, the pair of three bits is equal to one octal digit. There are only two steps to convert a binary number into an octal number which are as follows:

1. In the first step, we have to make the pairs of three bits on both sides of the binary point. If there will be one or two bits left in a pair of three bits pair, we add the required number of zeros on extreme sides.
2. In the second step, we write the octal digits corresponding to each pair.

Example 1: $(111110101011.0011)_2$

1. Firstly, we make pairs of three bits on both sides of the binary point.

111 110 101 011.001 1

On the right side of the binary point, the last pair has only one bit. To make it a complete pair of three bits, we added two zeros on the extreme side.

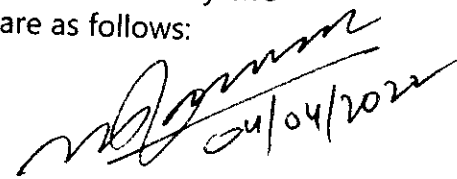

111 110 101 011.001 100

2. Then we wrote the octal digits, which correspond to each pair.

$(111110101011.0011)_2 = (7653.14)_8$

Binary to Hexadecimal Conversion

The base numbers of binary and hexadecimal are 2 and 16, respectively. In a binary number, the pair of four bits is equal to one hexadecimal digit. There are also only two steps to convert a binary number into a hexadecimal number which are as follows:

HYDERABAD-500034

Combinational circuit is a circuit in which we combine the different gates in the circuit, for example encoder, decoder, multiplexer and demultiplexer. Some of the characteristics of combinational circuits are following –

- The output of combinational circuit at any instant of time & depends only on the levels present at input terminals.
- The combinational circuit does not use any memory. The previous state of input does not have any effect on the present state of the circuit.
- A combinational circuit can have an n number of inputs and m number of outputs.

What is Multiplexer?

In electronics, a multiplexer also known as a data selector is a device that selects between several analog or digital input signals and forwards the selected input to a single output line. The selection is directed by a separate set of digital inputs known as select lines. A multiplexer of inputs has select lines, which are used to select which input line to send to the output.

What is Demultiplexer?

The data distributor, known more commonly as a Demultiplexer or “Demux” for short, is the exact opposite of the Multiplexer we saw in the previous tutorial.

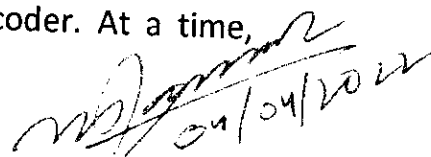

The demultiplexer takes one single input data line and then switches it to any one of a number of individual output lines one at a time. The demultiplexer converts a serial data signal at the input to a parallel data at its output lines

What is Encoder?

An encoder in digital electronics is a one-hot to binary converter. That is, if there are 2^n input lines, and at most only one of them will ever be high, the binary code of this 'hot' line is produced on the n -bit output lines. A binary encoder is the dual of a binary decoder.

What is Decoder?

The combinational circuit that changes the binary information into 2^N output lines is known as Decoders. The binary information is passed in the form of N input lines. The output lines define the 2^N -bit code for the binary information. In simple words, the Decoder performs the reverse operation of the Encoder. At a time,

HYDERABAD 500 046.

only one input line is activated for simplicity. The produced 2^N -bit output code is equivalent to the binary information.

After the session, a 25 marks quiz was conducted via google forms created by Syed Diraar Ahmed (technical head IEEE CASS, MJCET) whose scores and answer explanations were mailed to students the next day for gauging their progress. The session was interactive with comprehensive doubt clearing sessions by Mohammad Ibrahim (Secretary IEEE CASS, MJCET). Concise notes of the classes were made by Nida Zia (Chairperson, IEEE CASS, MJCET) and forwarded to students for future quick reference.

Introduction to building a strong foundation for the students who wish to venture into the VLSI chip design domain. Topics covered are combinational logic circuits-2 which includes:

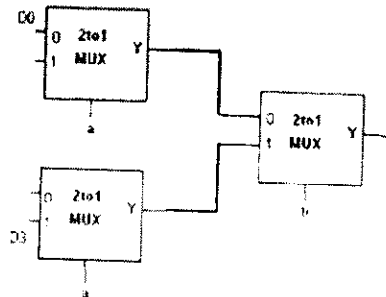

Multiplexers:

The multiplexer, shortened to "MUX" or "MPX", is a combinational logic circuit designed to switch one of several input lines through to a single common output line by the application of a control signal.

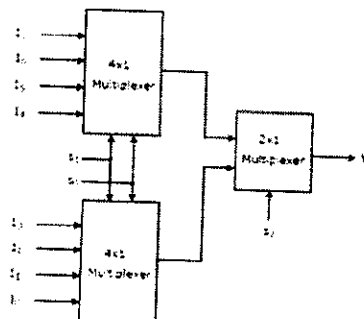

i. Implementing logic expression using mux:

- The first step is to select the multiplexer. If the given expression has n variables, then determine the multiplexer using the formula $2^n : 1$.
- Connect the inputs, that correspond to the given minterms to logic 1.
- Connect all the other inputs to the ground (logic 0).
- Connect the input variables (P, Q, R) as the selection lines

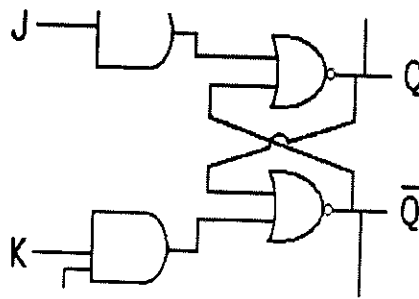

ii. 4:1 MUX using 2:1 MUX:

iii. Implementing 8:1 MUX:

FLIP - FLOPS:

Flip-flop is a device which stores a single bit (binary digit) of data; one of its two states represents a "one" and the other represents a "zero". Such data storage can be used for storage of state, and such a circuit is described as sequential logic in electronics.

SR FLIP-FLOP:

This simple flip-flop circuit has a set input (S) and a reset input (R).

SR Flip flop Truth table

INPUT		OUTPUT	
S	R	Q	Q [^]
0	0	0	1
0	1	0	1
1	0	1	0
1	1	0	0

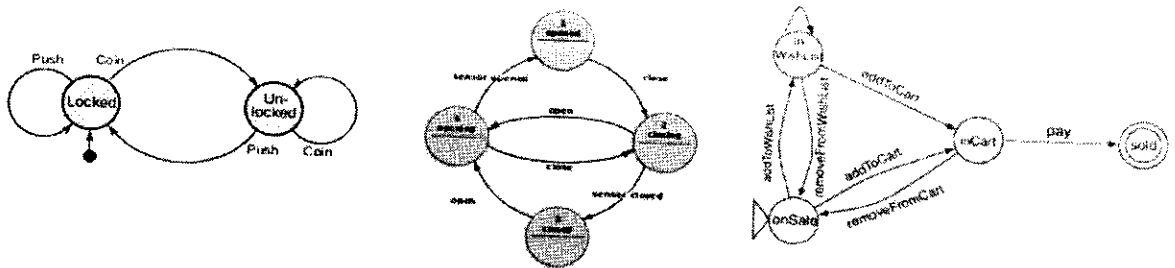

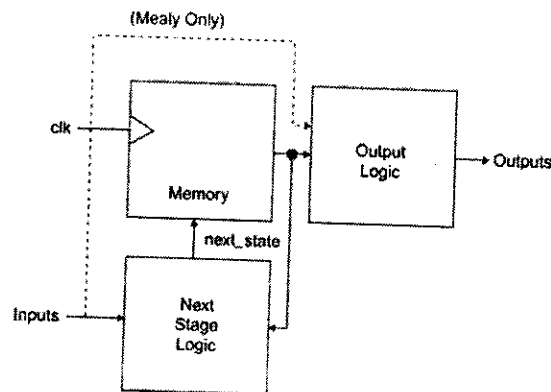

Flip-Flops:

JK flip-flop

- eliminate the undesirable condition of SR flip-flop
- J behaves like S (set); K behaves like R (reset)
- if J=K=1: and if Q=1, K=1, then R=1 and S=0; or if Q=0, J=1, then S=1 and R=0.

- Finite automata machine takes the string of symbol as input and changes its state accordingly. In the input, when a desired symbol is found then the transition occurs.
- While transition, the automata can either move to the next state or stay in the same state.
- FA has two states: accept state or reject state. When the input string is successfully processed and the automata reached its final state then it will accept.

WHAT ARE MEMORIES?

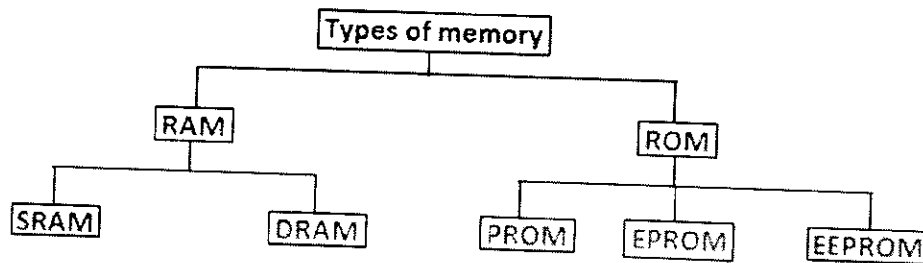

A memory is just like a human brain. It is used to store data and instruction. Computer memory is the storage space in computer where data is to be processed and instructions required for processing are stored.

WHAT ARE THE DIFFERENT TYPES OF MEMORIES?

Computer memory is of two basic types – Primary memory (RAM and ROM) and Secondary memory (hard drive, CD, etc). Random Access

[Signature]

Muffakkar Jaf College Of
Engineering & Technology
Banjara Hills, Road No. 3,
HYDERABAD-500 034.(T90)

Memory (RAM) is primary-volatile memory and Read-Only Memory (ROM) is primary-non-volatile memory.

Classification of computer memory

Random Access Memory (RAM):

It is also called read-write memory or the main memory or the primary memory.

Read-Only Memory (ROM):

Stores crucial information essential to operate the system is like the program essential to boot the computer.

Types of Read-Only Memory (ROM):

PROM (Programmable read-only memory) – It can be programmed by the user. Once programmed, the data and instructions in it cannot be changed.

EPROM (Erasable Programmable read-only memory) – It can be reprogrammed. To erase data from it, expose it to ultraviolet light. To reprogram it, erase all the previous data.

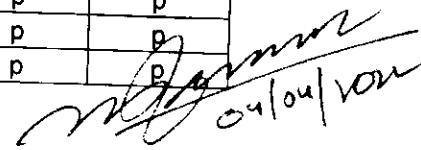

EEPROM (Electrically erasable programmable read-only memory) – The data can be erased by applying an electric field, with no need for ultraviolet light. We can erase only portions of the chip.

MROM (Mask ROM) – Mask ROM is a kind of read-only memory, that is masked off at the time of production. Like other types of ROM, mask ROM cannot enable the user to change the data stored in it. If it can, the process would be difficult or slow.

TOPICS: REVISION OF LOGIC GATES, COMBINATIONAL LOGIC CIRCUITS, SEQUENTIAL LOGIC CIRCUITS, FSM AND MEMORIES.

MUFFAKHAM JAH COLLEGE OF ENGINEERING & TECHNOLOGY
Banjara Hills Hyderabad

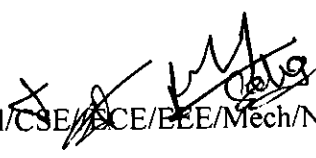

Date: 11/01/2021

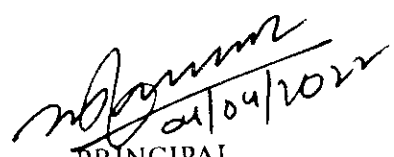

The IT department in collaboration with IEEE CIS is conducting a 30 day training program "HEAD START" from 10th Feb 2021 to 11th March 2021. The main aspect of conducting the training is to introduce the various domains that CIS offers to the students to work on as projects.

HODs are requested to inform all the BE II, III and IV year students regarding the same.

PROJECTS

ABOUT

Good engineers are not only a product of their academics but also their technical skills. Keeping that in mind, we at IEEE CIS have come up with the perfect HeadStart for one's technical development. This is the second of many events to come under the "HEADSTART" series that we have been conducting for the past year.

Open for all branches students are required to make projects that will not only help in making their resumes attractive, but also gives them a chance to enhance their skills in the chosen domain.

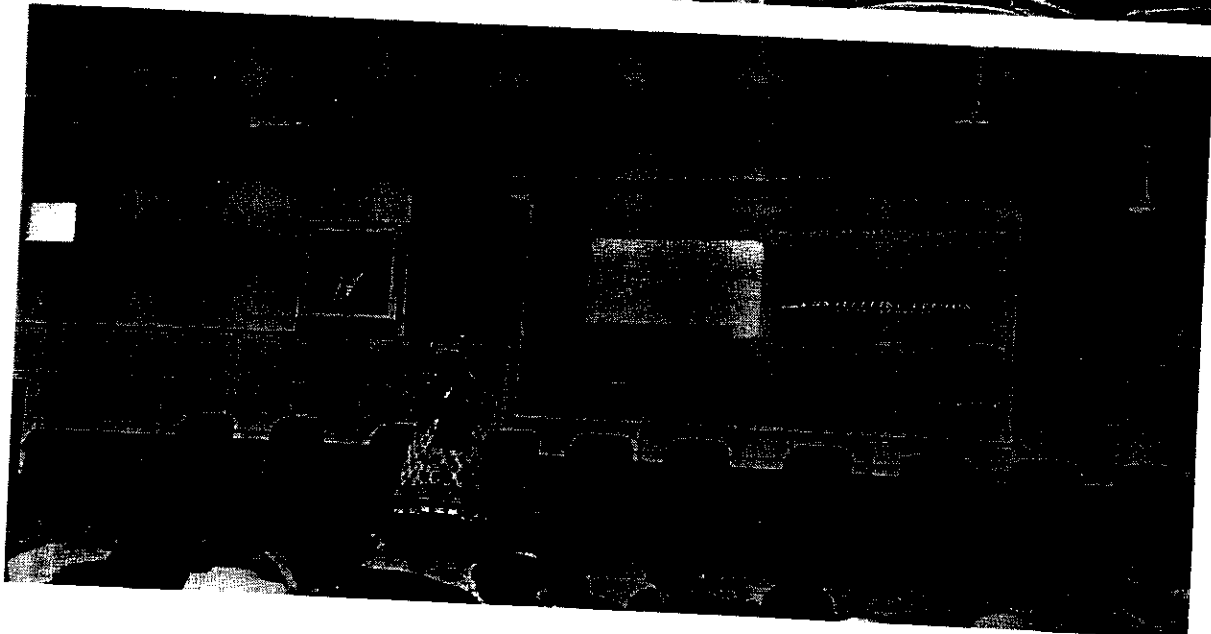

LAUNCH

The launch of the one month event at the Ghulam Ahmed Hall was impeccable. We had an overwhelming response of students from all the streams. Needless to

Mullathur
Engineering
Banjara Hills
HYDERABAD

say, projects greatly boosts up one's resume, be it for job opportunities or higher studies.

The enthusiasm of students to start this journey of self learning and amplify their skills was overwhelming. The main aspect of conducting the inauguration of HeadStart 2.0 was to introduce the various domains CIS offered for the students to work on as projects during this month long event.

Apart from that an overview of the details regarding the projects, the mentorship, learning scope etc were also discussed. The various domains of the event were:

- PYTHON
- UI/UX
- MACHINE LEARNING
- MS EXCEL
- GAME DEVELOPMENT
- WEB DEVELOPMENT
- AUGMENTED REALITY
- CLOUD COMPUTING

PROJECTS

"Achievement Unlocked" was all about unfolding the magnificent projects created by our participants, who in the process not only built projects, but developed numerous other skills of immense utilization in their prospective careers.

AR/VR:

- Fruit Mania
- Harry potter project tracking
- Basketball (Hoops or oops)

-Food delivery page

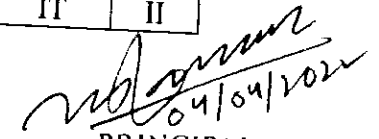

A month-long journey full of highs and lows, but those who managed to stick through it all, deserved a notable appreciation in the form of a certificate of completion.

Certification along with Mrs. Mousmi Ajay Chaurasia's kind and motivating words marked the end of this month-long event.

ECED MJCET, organized one month workshop on “Web development” for a group of 120 candidates participating from II,III,& IV years.They were trained in the field of web development and got hands-on experience.

Workshop aimed at polishing student's skills in web development domain in order to get an internship.

Prior to the program, we provided participants with day wise curriculum and a handout for IDE installation.

Day wise Curriculum of the Event:

Day	Topics that will be covered	Duration
0	Introduction Session	1 hour
1	Getting Started – Overview on web dev. Frontend, Backend, Business layer, overall explanation. (Sharing IDE/Environment Setup)	1 hour
2	Getting Started with HTML – Familiar with IDE, Extension, Shortcut, Structure, Tags: Headings, paragraph, bold, strong, emphasize, italic.	1 hour
3	Tags: Break, line, link, anchor, image, lists.	1 hour
4	Let's Discuss Forms, Div, Span, Meta Tags and ID, Classes.	1 hour
5	Getting Started with CSS: What it is?, Fundamentals, Ways to apply, Fonts, Colors.	1 hour
6	Selectors: Basic, id, classes, attribute selector etc., Utility classes	1 hour
7	Specificity: Order & Calculation	1 hour
8	Getting Familiar with Chrome Developer Tools	1 hour
9	CSS Border, Box Model, Margin Collapsing, inline vs Block level elements, display properties	1 hour
10	Box sizing , Default settings, Text Align, Font Weight, Text related properties	1 hour
11	Pseudo classes & Pseudo Elements	1 hour
12	CSS Units: Absolute, Relative(px, inch, pt, cm)	1 hour
13	(%, em, rem, vh, vw, vmax, vmin) CSS Floats and Clear	1 hour
14	CSS – Positions, Project Assignment	1 hour
15	CSS Media Queries (Lets make it responsive)	1 hour
16	CSS Animations, Hamburger Menu	1 hour
17	Getting Started with JavaScript: History, Terminologies and Introduction	1 hour
18	JS Values & Variables	1 hour

Day	Topics that will be covered	Duration
19	Boolean, Strings, String Template literals, parseInt , parseFloat, typeof()	1 hour
20	Conditionals in JS, Comparison Operators, if, if-else,switch	1 hour
21	Everything About Arrays	1 hour
22	Loops , Functions	1 hour
23	This keyword, DOM Manipulation, Communicating with Events	1 hour
24	Making HTTP Requests, Async, Await	1 hour
25	Bootstrap	2hour
26	Short-listing Internships & Application	---
27	Short-listing Internships & Application	---
28	Sessions on Core	1 hour

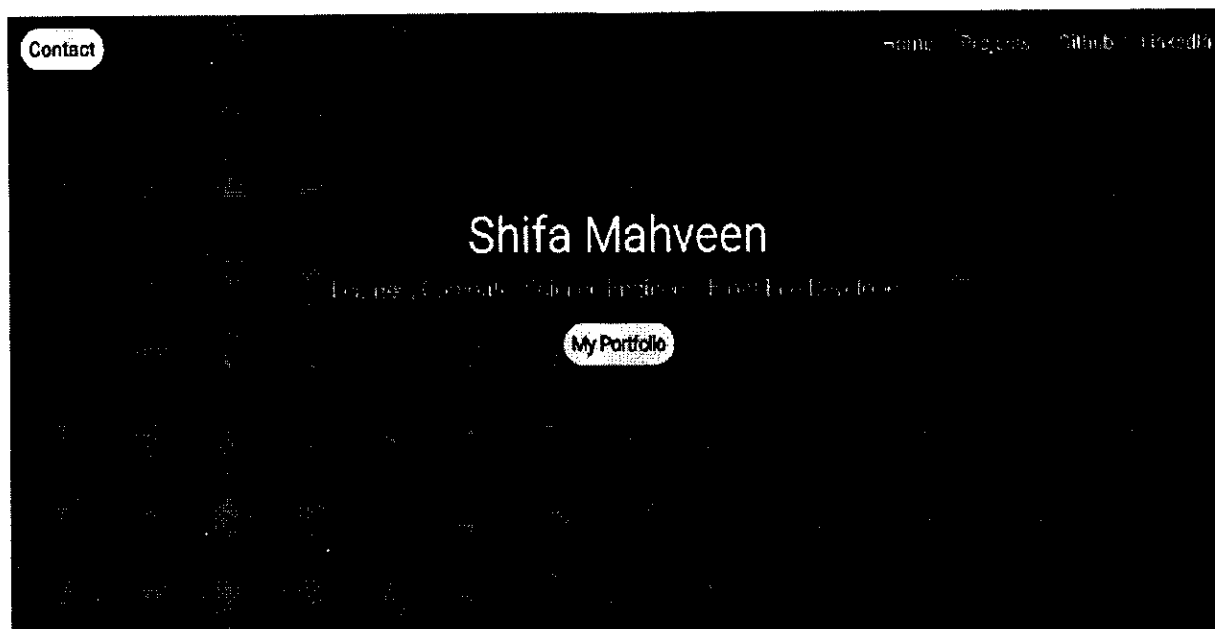

As an introduction session, Dr. Arifuddin Soheli enlightened the candidates about the program.

Everyday, the workshop was planned in an hourly-basis consisting of concepts, hands-on and doubt clearing session. Further they were assessed on the basis of daily quizzes and tasks. Moreover candidates were also given 2 main projects-

1. Portfolio using HTML,CSS
2. Portfolio using Bootstrap

ABOUT ME!

I am Syeda Umme Salma.
I am a beginner in front end web development
and a member of design team of Mas MUCET.
I've completed my diploma from Quaid-e-Azam Government
polytechnic.
I am pursuing engineering from Muffakham Jah College of
Engineering and Technology. I am self motivated, enthusiastic,
adventurous person and
I am punctual when it comes to time.
My goal is to become a Web developer.

Academics
Get to know about my
Academics and my performance
from very beginning and
academic achievements.

Certificates
You can scrutinize my
certifications from MOOCs
Learning platforms i.e.
(Coursera, SoloLearn, Udemy).

Organizations
Here is the list for which
I have worked as a beginner
and my certifications
provided by them and more.

Design Projects
As I am a Computer science
student and a designer too,
I have got a couple of design
projects on my canva profile.

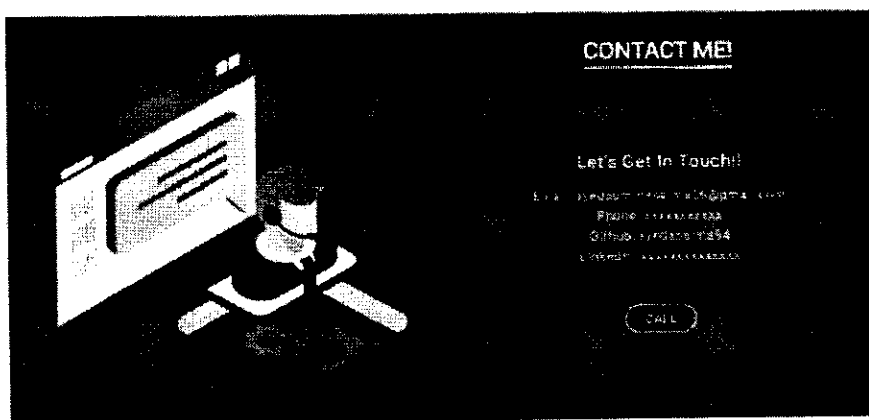

WHY ME?

Instead of explaining why to hire me, I just wanna show how my code
looks in case of Software development as "Code Speaks" and in case of
Design We all know that "Design expresses the feelings".
Here a look on both GitHub and Design Projects Section.
